

Backup for Microsoft 365

Your business constantly creates data that drives your operations and growth. So, who is responsible for protecting and backing it up?

You may believe that Microsoft maintains all your Microsoft 365™ data. However, the reality is the burden can fall on you— unless you elect to add Backup for Microsoft 365.

Adding this vital online backup service can help protect you from security incidents such as ransomware and business email compromise (BEC), as well as file and account deletions that exceed the default Microsoft retention policies.

With Backup for Microsoft 365, we can help you recover files and accounts at any time, even if they are accidentally or maliciously deleted by an insider or external cybercriminal.

Automate backup to protect your files

We will manage your Backup for Microsoft 365 to:

- Back up Microsoft 365 Exchange™
- Back up Microsoft 365 OneDrive®
- Back up Microsoft 365 SharePoint® (including Microsoft Teams® files and data that are stored in SharePoint)
- Custom- and sub-libraries are backed up and can be recovered individually as needed

Retain and recover your data

We will use the solution to help ensure you can:

- Recover the data you want swiftly and easily
- Meet retention requirements for data storage
- Retain and recover Microsoft 365 Exchange email, calendars, contacts, and tasks
- Retain and recover Microsoft 365 OneDrive data
- Retain and recover Microsoft 365 SharePoint data and permissions

COMSTECH

Your Trusted IT Partner
